

**GENERAC®**

## RECREATIONAL VEHICLE GENERATORS

QuietPact™ • PrimePact™

# Value and Reliability for the Long Haul

What do you think about while you are on vacation? Are you planning your next hike or mapping the route to your next destination? Whatever your thoughts may be, you won't have to worry about your power with your Generac RV generator.

Because Generac has been serving RV customers for over 35 years, we know reliability is the number one feature you require. Powered by Generac's OHVI® engine, these models have been tested and manufactured specifically for the unique needs and situations of recreational vehicles, for worry-free reliability and exceptional value.

## Advanced Technology in Every Generac RV Generator

**Our Commitment to Innovative Design** shows in greater noise reduction through advanced piston and gear technologies and an enclosure with our exclusive RhinoCoat finish for added durability. Engine advancements greatly increase life expectancy and Generac RV generator owners also benefit from single side serviceability for easy maintenance access.

**Generac's OHVI Engine** is designed specifically for generator use. It runs cooler, reducing oil consumption and the automotive style pressure lubrication and spin-on oil filter ensure proper lubrication of internal engine components at all times. The features reduce engine wear for a significantly longer life than competitive engines.

### **Smooth Power Output with Solid State Frequency Compensated Voltage Regulation**

Standard on Generac RV generators, the state-of-the-art power maximizing regulatory system optimizes fast response to changing load conditions and allows for maximum motor starting capability for smoother starts.

#### **PRIMEFACT® Units Offer the Most kW output for your money.**

- Installation flexibility from multiple muffler configurations allow for easy adaptability for virtually any installation.
- Single side serviceability means easy access to all maintenance items including the automotive style spin-on oil filter.
- RVIA, EPA and CARB emissions compliant

#### **QUIETPACT® Gasoline and Propane Models are Among the Quietest in Their Class.**

All models feature:

- Compact design with the same footprint as competitive models.
- Quiet design with advanced pistons, camshaft and gear technologies.
- Single side serviceability means easy access to all maintenance items including the automotive style spin-on oil filter.
- All steel enclosures provide superior noise reduction and durability with RhinoCoat™ finish.
- RVIA, EPA and CARB emissions compliant.

#### **QUIETPACT® Diesel 85 Provides the Highly Efficient, Cost-effective Benefits of Diesel.**

- Superior power output and cooling capacity.
- RVIA, EPA and CARB emissions compliant – exceeds Tier III and IV ratings.

## Service, Support and Aftermarket Accessories

With trained and authorized service locations throughout North America, you can rest assured that needed support is within reach. Find a dealer or service location through our dealer locator on [www.generac.com](http://www.generac.com) or by calling 1-888-GENERAC. Service and owner's manuals and spec sheets can also be found on our website. For parts, maintenance kits and accessories, see a Generac RV Dealer.

### **WARRANTY**

All Generac RV generators are covered by an industry leading 3-year limited transferable warranty. If you decide to sell your RV within the warranty period, the warranty is transferable to the new owner.

# A Wide Range of Sizes

Generac RV generators come in a wide range of sizes and fuel types to power any adventure - at any time. This ensures the air conditioner, stove-top and lights stay on while you relax and continue to enjoy your RV lifestyle.

## GASOLINE SOLUTIONS

Ranging from 3.6 – 7.5 kW, Generac gasoline generators pack more power into a small footprint while still offering superior noise reduction. Our entire gasoline line is now evap-compliant, meeting the most up-to-date CARB standards.

### QUIETPACT 40 G

Superior Fuel Economy – Optimized engine performance results in best fuel economy in its class, up to 43% more fuel efficient than competitive units.

### QUIETPACT 45/55/65 G

- *One-Touch Start* allows the generator to automatically prime itself and start up. If required, the generator will repeat the starting sequence automatically until the unit starts.
- On Board Diagnostics and Indicator – Self diagnosing technology indicates a potential problem through a series of blinks shown on an LED located on the generator Start/Stop switch, or in the associated remote Start/Stop harness.
- Electronic Governor Control – Electronic governor control maintains a constant engine speed of 60 Hertz to eliminate surging.

### PRIMEPACT® 50 G

Reliable Value – A cost-effective solution giving the greatest power output per dollar.

- Class A and C Motor homes (single air conditioning)
- Fifth Wheels
- Travel Trailers
- Fire/Rescue Vehicles

- Class B and C Motor homes (single air conditioning)
- Fifth Wheels
- Towable Applications
- Sport Utility Trailers

## PROPANE SOLUTIONS

Ranging from 3.4 – 7.5 kW, Generac propane generators are the largest LP models on the market, providing maximum wattage output and improved performance. And propane is a more environmentally friendly fuel choice, with a better emissions profile

### QUIETPACT 40 LP

Superior Fuel Economy – Optimized engine performance results in best fuel economy in its class, up to 43% more fuel efficient than competitive units.

### QUIETPACT 55/65/75 LP

Most Powerful Engine – These generators feature a 760cc, 27hp Generac OHVI V-twin engine. The largest engine in air-cooled RV power generation allows for constant output under extreme conditions.

### PRIMEPACT 50 LP

Reliable Value – A cost-effective solution giving the greatest power output per dollar.

## DIESEL SOLUTIONS

Delivering 8.5 kW, the QuietPact Diesel 85 provides fuel efficient operation at a constant speed with superior cooling capacity.

### QUIETPACT DIESEL 85

- Constant RPM – Speed control allows the 1131cc in-line engine to run at a constant 1950 RPM under any load, meaning no noisy speed changes and increased horsepower and torque.
- Superior Power Output – Radiator cooling capacity is 40% larger than traditional units so there is less wattage drop-off in elevated temperatures.
